Message from,

Managing Director

“ It gives immense pleasure to me and my team in welcoming you all- be it customers, vendors, auditors, statutory authorities, well-wishers or employees etc. all. As we embark upon our journey to scale newer heights in terms of technology, innovation in line with latest world trend with a vision of global reach we feel confident in achieving highest customer satisfaction coupled with confidence of vendors and empowered, knowledgeable & vibrant employees we rededicate ourselves towards quality & safety of our products, our employees, our customers and transporters.

We also strive hard always and will continue to do so in achieving excellence in every field of our activities be it product and service quality, in time delivery, preserving environment & ensuring safety. Over the years we had kept pace with client requirement and technology upgradation of quality instruments, ensuring latest calibration instruments availability for achieving our quality goals and will continue to do so in achieving our global leadership goals. We have enviable reputation in providing site based service solving emergency & improvement needs of customers and we will leave no stones unturned in keeping our these efforts on a regular basis in future too.

For us customers are as important as our vendors and our employees. We will always give our priority to all of them. We will achieve these utilizing knowledge of our people and organization. Come, let all of us make full-fledged efforts to achieve our vision a reality. ”

MB Singh

Mr. Munna B. Singh
Managing Director

About us & History

Our story also started with the first step taken by our founder way back in the year 2002 when he left the comfortable life of a well to do company employee in Mumbai and took the challenge of setting up something of his own. This started from Ankleshwar on a humble note then but with a vision to be somebody in near future serving the demanding needs of large Indian & Multinational Chemical, Pharmaceutical, Petrochemical and other industries and strive to put forward a global footprint. He put efforts tirelessly with the help of his team of engineers and managers - which resulted in making Fidicon a brand to reckon with.

Over the years they had kept on adding new products, solving not only urgent maintenance and servicing needs of clients but also helping them in indigenizing their components providing similar or better quality at a considerable cost benefits.

Today Fidicon is not only fulfilling the needs of local markets but does considerable of its business from exports to Middle East, North America (USA & Canada), Europe etc. These include Process Control, Safety Equipment & Measuring Instruments like Breather Valves, Flame Arresters, Safety Relief Valves, Pressure Reducing Valves, Pressure Reducing Stations, Strainers, Pipe Line Strainers, Sight Flow Indicators, Manometers, Side & Top Mounted Level Switches, Gauge Hatches, Metal Tube Rotameters, Glass Tube Rotameters, Purge Rotameters, By Pass Rotameters, Orifice Flange Assemblies, Liquid Level Indicators and many more.

Fidicon is very much focused on customer service and gives urgent attention to their needs. It has a 24X7 service with a toll-free number where customers can reach and ask for solution of urgent, special and long term needs. The design, development, production, quality and service departments are backed by dynamic, talented and dedicated team of engineers and managers with an eye to details of everything they do.

2002 - 2005

In this period the company struggled with apex effort in field of manufacturing and some of the trading products with good quality & fulfilling customers demand competing several renounce brands.

2005 - 2007

since the period, the company developed several products and started manufacturing Process Control & Measurement and Safety Equipment in year of 2005, such as Variable Area Flowmeters, Control Valves, Breather Valves, Flame Arresters, Pressure Safety Valves, Level Indicators etc.

2007 - 2014

since the period between 2007 to 2014, we added few new products to our manufacturing scope such as Pressure Reducing Valve, Gauge hatch, Emergency Vent Valve, Level Transmitters, PRS System, etc.

2014 - 2019

Company developed it's manufacturing unit, with enormous Hi-Tech machines tools, safety gears, quality measuring instruments along with training to the employees to curb the demands of customer with high quality and optimum price.

2019 - 2022

company kept expanding it's portfolio along the wide range of solutions oriented products and service offerings to the valuable customers and fidicon endeavors to supply them within committed delivery time. company has been growing and it's converted to the private limited entity in 2021. company has enhanced design and research and development departments, and since providing customers solutions like never before, company has expanded more in terms of production capabilities.

Range of Products

Our Approvals

- FLAME ARRESTER
- BREATHER VALVE
- PRESSURE RELIEF VALVE
- SAFETY RELIEF VALVE
- RUPTURE DISC
- EMERGENCY RELIEF VALVE
- GAUGE HATCH
- PRESSURE REDUCING STATION

SAFETY EQUIPMENT

- 
- VARIABLE AREA FLOWMETERS
 - METAL TUBE ROTAMETER
 - GLASS TUBE ROTAMETER
 - LOW FLOW ROTAMETER
 - ACRYLIC BODY ROTAMETER
 - BY PASS ROTAMETER
 - ORIFICE FLANGE ASSEMBLIES
 - PURGE ROTAMETER

FLOW MEASURING INSTRUMENTS

- SIDE MOUNTED HEAVY DUTY TUBULAR LEVEL INDICATOR
- REFLEX LEVEL GAUGE
- FLOAT AND BOARD LEVEL INDICATOR
- FLOAT AND BOARD MAGNETIC LEVEL INDICATOR
- SIDE MOUNTED MAGNETIC LEVEL INDICATOR
- TOP MOUNTED LEVEL INDICATOR
- TOP MOUNTED MAGNETIC LEVEL INDICATOR
- CAPACITANCE LEVEL INDICATOR SWITCH & TRANSMITTER
- DISPLACER LEVEL SWITCH
- TOP MOUNTED MAGNETIC LEVEL SWITCH
- SIDE MOUNTED MAGNETIC LEVEL SWITCH
- FORK TYPE LEVEL SWITCH
- SIDE MOUNTED MAGNETIC LEVEL INDICATOR WITH TRANSMITTER
- TOP MOUNTED MAGNETIC LEVEL INDICATOR WITH TRANSMITTER
- REFLEX LEVEL GAUGE TRANSPARENT TYPE

LEVEL MEASURING INSTRUMENTS

- INCLINED TUBE MANOMETER
- U-TUBE MANOMETER
- SINGLE LIMB MANOMETER
- MACLEOD GAUGE
- ABSOLUTE MANOMETER

**PRESSURE & VACUUM
MEASURING
INSTRUMENTS**

- 
- The background image shows a complex industrial piping system. A prominent feature is a red pressure-reducing valve mounted on a blue pipe. To its left, a clear cylindrical sight glass is installed. The pipes are painted in light blue and yellow, and the entire system is set within a large industrial facility with a high ceiling and structural beams.
- AIR HEADER
 - Y - TYPE STRAINER
 - CONICAL TYPE STRAINER
 - BASKET TYPE STRAINER
 - T - TYPE STRAINER
 - DUPLEX TYPE STRAINER
 - PRESSURE REDUCING VALVE
 - BACK PRESSURE REDUCING VALVE
 - FULL VIEW SIGHT GLASS
 - SIGHT FLOW INDICATOR
(DOUBLE WINDOW INDICATOR)

PROCESS & CONTROL INSTRUMENTS

Our QEHS Policy

We the team of Fidicon, engaged in the business of Manufacturing and Delivering of Process Control, Measuring Instruments, Safety Equipment & Accessories, and are committed to following for Our QEHSMS Performance.

- ◆ Understand & identify the needs, requirement and expectation of our valued customers and interested parties.
- ◆ Consistently supply right quality products abiding to right manufacturing practices.
- ◆ Comply with all the applicable statutory and regulatory requirements.
- ◆ Strive to achieve utmost satisfaction of all interested parties through continual improvement in operations and QEHS Management Systems.
- ◆ Conserve energy, natural resources, raw material and others by the way of effective operations, selection of efficient and environment friendly technology as far as possible and effective waste management.
- ◆ Effective management of various risks and opportunities involved in maintaining the QEHS performance of organization.
- ◆ Reduce environmental incidents and harm to people and damage to property.
- ◆ Maintain the knowledge needed for performing of organizational processes by imparting training, spreading awareness and appropriate involvement of working people.
- ◆ Develop, implement, maintain and continually improve the effectiveness of the QEHS Management System in accordance with standard requirements (ISO 9001, ISO 14001 and ISO 45001).

Managing Director

Testing Facility

We have State of Art Facilities for Performance Tests, Endurance Tests, Leak Tests, Hydro Tests, Safety Tests, Function Tests of Instruments & Equipments.

We follow International Standards to conduct Safety tests for Flame Arresters, Breather Valves, Pressure Safety Valves, Gauge Hatches, Emergency Relief Hatch, Pressure Reducing Station etc. and all Major Products. Test Bench Complies With Indian / ISO Standards, and All of the Master Instruments are Calibrated using NABL (National Accreditation Board For Testing And Calibration Laboratories) Approved Facility.

Fidicon specialized in product testing and calibration all our major product categories such as Rotameters, Flowmeters, Strainers, Level Indicators, Level Switch/Sensors, Manometers, Pressure Reducing Valves & Station, Safety equipment such as Flame Arresters, Breather Valves, Safety Relief Valve, Emergency Hatch, Gauge Hatch etc. through years of innovation and knowledge gained.

We follow internationally accepted practice and protocols for the compliance of Indian and international standards with accurate, prompt and reliable test results.

Service Facility

All products must be repaired at some point. Incorrect repairs or the use of inferior parts create safety risks. That's why being your reliability partner means we carefully plan maintenance and only use original spare parts to reduce the number of unexpected production breaks and failures. Quality repairs using original spare parts ensure that your products meet their original specifications after maintenance and will reach their maximum lifetime.

Our service technicians and engineers are experienced, well trained and follow ISO 9001-certified processes; or while on assignment at your production plants. Our service teams use the latest tools and equipment, enabling us to deliver the best possible valve repairs in a professional and timely manner.

You can count on our field service experts to support you – from regular product repairs and maintenance planning through to complete life-cycle planning and execution. We offer training, maintenance supervision and can educate your personnel on your installed base and better diagnostics utilization. For special projects, a dedicated valve expert can be assigned to your plant to support your long-term maintenance needs.

Industries we're serving,

Research & Defense

Food & Processing Equipment

Waste Management

Chemical Process & Treatment

Agro & Pharma

Manufacturing

Oil & Gas Fields

Mining

...and many more,

Research and Development

Research and Development Tasks, whose all the process begins with customer or user's perspective and their needs, it takes off further with the thought process of, how we can solve this and make their process more easier?

We believe that well designed products are not just for end consumer products but industrial goods as well. In fact it is in most demanding work conditions such as a factory or a plant where good designed products can make a difference to life of the user. Fidicon has a dedicated internal industrial design team which assures that all new product developments at work premises meet technical specifications along with their intended purpose in the simplest, convenient and aesthetically pleasing manner.

Our history demonstrates our true competitive advantages. We offer unrivalled product reliability and customer service, especially where site-specific planning or design is required.

Our team is happy to offer tailored solutions, based on years of industry knowledge and expertise. As each situation is different you can rest assured that we will always propose the safest, most appropriate solution for your unique application. We are delighted that customer referrals and word-of-mouth have become 'our most effective salesman' over the years.

Fidicon is Constantly making impact in Customer's Regular Needs, as will continue to do so, by offering our upcoming Next Generation of All Devices and Instruments with Patented and Most Rugged Design with huge technical information to track and Minimize all of your production losses. Initiating the launch of products by 2025.

To Make Fidicon Devices India Private Limited a world class manufacturer and preferred choice of worldwide customers for our Process Control, Measuring Instruments, Safety Equipment and accessories by putting all our efforts employing best business experiences through relationship built on integrity, success built on performance, fueled by a commitment for continual improvement personally & professionally and make FIDICON a brand to reckon with in the world.

Our Vision

To organize and utilize all resources like human resource, technology, management systems, infrastructure and finance in creating Fidicon Devices India Private Limited as a world class manufacturing company.

To create an organization where creativity, innovation, modernization go parallel with design, manufacturing, inspection, testing and quality assurance activities applying TQM in principle in all our activities.

Be a good corporate citizen abiding by the statutory and regulatory requirements of the government of countries where we plan to operate in.

Put all our efforts in keeping the environment clean and employing excellent control mechanism for safety & health of people involved in all our activities for all the time as an ongoing process.

Our human resource to be the driving force for achieving day to day & all the above targets.

Our Mission

Corporate Social Responsibility

- “ Fidicon Devices India Pvt. Ltd is dedicated to Protection of Environment, Gender Equality, Energy Conservation, Reduction of Waste etc all. ”
- “ For the society at large we are arranging Blood donation camps along with Indian red Cross and also have Free Eye Check ups for economically weak people living nearby. ”
- “ With limited availability of land, we have planted good numbers of plants outside as well as inside our plant with introduction of a variety of plants in a large numbers of pots. ”
- “ We cover all our employees under medical insurance, annual medical health check- up and feedback. We are also an equal opportunity employment provider and have Code of Conducts in our organisation ”

- “ Our products are such that it ensures safety and prevention of harmful, toxic or corrosive material discharge, fire prevention etc. during the process cycles of Chemical, Pharmaceutical, Petrochemical, Energy and a host of other industries. ”
- “ Our products not only ensure safety of the equipment and machines but also ensures personnel safety. ”
- “ We have taken improvement projects ensuring reduction of reactive power, finding possibilities of energy conservation by the application of solar power, use of battery-operated vehicles for material movement etc. ”
